DataForSEO Test Report: Crawllex v2

Client site: logicalcreations.net (Logical Creations, Lahore) · Test date: 5 Nov 2026 · Budget used: $0.7226 of $1.00 free credit · Prepared for: senior review

$2.13–3.90 / $3.27–5.07 / $7.39–9.18	$1.03	19	$0.2774
Est. monthly range: small / large / business site	Est. one full cycle, 100 pages	Paid API calls run (test)	Credit left (for next test)

Phase 1. Scope and method

- Goal: estimate DataForSEO cost per Crawllex project and show what data the API returns, focused on **LLM visibility** (AI answers) and **Local SEO** (Google Business Profile, Maps rank).
- Method: one live or Standard-queue call per endpoint, measured with the `cost` field of each response. Results compared with the planning figures in product plan v2, section 5.7.
- Test set: one client site (logicalcreations.net, about 263 URLs in sitemaps), 3 keyword sets, 2 locations (Lahore, Jeddah), 1 GBP listing.
- No production data was changed. Read-only access to the Crawllex production record for the client.

Phase 2. Verified unit prices

Endpoint	Mode	Measured (USD)	Plan figure (USD)	Status
LLM Mentions, top cited domains (10 rows)	Live	0.110	0.10 + 0.001/row	Confirmed
LLM Mentions, search or top brands (0 rows)	Live	0.100	0.10 floor	Floor confirmed
Maps SERP, 20 results	Standard	0.0006	0.0006	Confirmed
Maps SERP, 20 results	Live	0.0020	0.0006 (wrong)	Corrected
GBP profile	Standard	0.0015	0.0015	Confirmed
GBP profile	Live	0.0054	0.0015 (wrong)	Corrected
GBP reviews (50 requested, 15 returned)	Standard	0.00375	0.00075 per 10	Confirmed; retrieval free
Keyword ideas (30 items)	Live	0.0156	0.012 + 0.00012/item	Confirmed
Keyword volume (8 keywords)	Live	0.090	0.06 Standard	Confirmed
Backlinks summary	Live	0.024	0.024	Confirmed
Labs domain overview, ranked keywords, competitors	Live	0.012	0.012 + 0.00012/item	Fee confirmed; item price not tested (0 items)
Historical rank (Labs)	Live	n/t	0.12 + 0.0012/item	Official page; plan figure was wrong

Rule for budgeting: nightly and weekly jobs must use Standard (task_post). Live costs 3.3x more for Maps and 3.6x more for GBP profile.

Phase 3. Monthly cost estimate per project

Job (100 keywords, one domain)	Frequency	Plan (USD/mo)	Updated (USD/mo)
Tracked keyword rank, 100 keywords (Maps/SERP Standard)	Daily	1.80	1.80
LLM visibility, 100 rows per task	Weekly	0.86	0.86
Ranked keyword discovery (1000 items max)	Weekly	0.57	0.57 (ceiling)
Keyword ideas (1000 items)	4 per month	0.53	0.53 (ceiling)
Historical rank (Labs, 36 months)	Monthly	0.02	0.16
Map rank, 100 keywords (Standard)	Weekly	0.26	0.26
Backlinks new and lost (up to 1000 rows)	Weekly	0.26	0.26
Backlinks summary	Weekly	0.10	0.10
Backlinks list, referring domains, anchors	Monthly	0.18	0.18
Domain overview, competitors, intersection (Labs)	Weekly / monthly	0.09	0.09
Keyword volume (Google Ads, Standard)	Monthly	0.06	0.06
On-page audit, 50 pages	Monthly	0.01	0.01
GBP profile and reviews	Weekly / monthly	0.03	0.03
Total, 100 keywords, 100 pages		**4.77**	**4.91**

Ceilings: Labs and keyword ideas are priced at the 1000-item maximum. This site returned 0 Labs items, so its real cost is lower.

Monthly cost by site size, USD per month (low to high range)

Item	Small (<100 pages, 50 kw)	Large (500–1000 pages, 100 kw)	Business (>1000 pages, 300 kw)	Range basis
Keyword rank, daily (Standard, 1 SERP per kw per day)	0.900	1.800	5.400	Fixed: $0.0006 x kw x 30
Map rank, weekly (Standard)	0.129	0.258	0.774	Fixed: $0.0006 x kw x 4.3
On-page audit, monthly	0.013–0.015	0.125–0.150	0.125–0.150	$0.000125 (help center) to $0.00015 (pricing page) per page
LLM visibility, weekly (100 rows)	0.430–0.860	0.430–0.860	0.430–0.860	0 rows ($0.10 floor) to 100 rows ($0.20 per task)
Keyword ideas, 4 per month	0.062–0.528	0.062–0.528	0.062–0.528	30 items (measured) to 1000 items
Ranked keyword discovery, weekly	0.052–0.568	0.052–0.568	0.052–0.568	0 items (measured) to 1000 items
Historical rank, monthly (36 months)	0.120–0.163	0.120–0.163	0.120–0.163	0 items to 36 items
Domain overview, weekly	0.052	0.052	0.052	Measured $0.012 per task
Competitors and intersection, monthly (2 tasks)	0.024–0.037	0.024–0.037	0.024–0.037	0 to about 110 items
Keyword volume, monthly	0.060–0.090	0.060–0.090	0.060–0.090	Standard $0.06 to Live $0.09 per task
Backlinks summary, weekly	0.103	0.103	0.103	Measured $0.024 per task

Backlinks new and lost, weekly	0.103–0.258	0.103–0.258	0.103–0.258	0 rows to 1000 rows
Backlinks list, monthly (3 tasks)	0.072–0.180	0.072–0.180	0.072–0.180	0 rows to 1000 rows
GBP profile, weekly	0.006	0.006	0.006	Measured Standard $0.0015
GBP reviews, monthly	0.004–0.015	0.004–0.015	0.004–0.015	50 to 200 reviews
Total per month	**2.13–3.90**	**3.27–5.07**	**7.39–9.18**	

Low end: no Labs or backlink rows, LLM at floor. High end: full 1000-item Labs calls, 100 LLM rows per week, 1000 backlink rows. Real cost for a site with a real footprint sits between the two. Labs item prices and backlink row prices are not yet measured on a site with data. Gap of 100 to 500 pages is not in the size groups.

Cost of one full cycle (first onboarding run, 100 pages)

Item	USD
LLM visibility (100 rows)	0.20
Local: GBP profile, reviews (50), Maps rank 100 kw (Standard)	0.08
Keywords: volume, ideas (1000 items), 100-keyword rank check	0.25
Backlinks (summary, new/lost, list)	0.14
Labs: domain, competitors, ranked keywords (1000 items), historical rank	0.34
On-page crawl, 100 pages	0.02
Total one cycle	**1.03**

Phase 4. Data returned by the test

4a. Local SEO: Google Business Profile

- **Listing:** Logical Creations, category "Software company", claimed, website logicalcreations.net, 6 photos. Lahore office, Johar Town.
- **Rating:** 4.4 from 15 reviews. Split: 12 five-star, 1 four-star, 2 one-star. Dates 23 Sep 2025 to 29 Jan 2026.
- **Owner replies:** 0 of 15 reviews answered. This is an actionable finding for the client.
- **Identifiers:** CID and place_id returned, so future calls can use them directly.

4b. Local SEO: Maps rank for "web development company" (top 20 each)

Market	Logical Creations position	Top 3 competitors (rating, reviews)
Lahore	Not in top 20	GenXe Technologies (4.9, 263); First Idea Web Development (4.4, 160); SERPISTAN (4.9, 59)
Jeddah	Not in top 20	Sohoby (4.9, 83); Stand Out (4.8, 18); Adonix AI (4.8, 36)

Competitor Whetstonez (listed in the client's competitor set) ranks #8 in Jeddah with 5.0 rating and 50 reviews.

4c. LLM visibility (AI answers, Google AI)

- **Client domain:** 0 mentions for logicalcreations.net in Saudi Arabia for "AI automation", "website development" and the test target set. Cost still $0.10.
- **Top cited domains** for "AI automation" and "website development" (Saudi Arabia): youtube.com (29 mentions), coursera.org (15), reddit.com (15), wikipedia (13), geeksforgeeks.org (13). No agency domain in the top 10.
- **Competitor search** (whetstonez.com, telenoc.org): 0 mentions.
- **Implication:** AI visibility will show "not cited" for most small agencies. It is useful as a benchmark over time, not as a stand-alone sales proof.

4d. Keyword and demand data (Saudi Arabia, Google Ads)

Keyword	Volume / month	CPC (USD)	Competition
website development	12,100	3.84	Low
mobile app development company	210	42.10	Medium
AI automation	390	7.02	Medium
web development company	90	12.79	Medium
web design company	70	11.12	Medium
software house	110	2.49	Low

Keyword ideas (Pakistan seeds): 146,577 related ideas available. Sample top ideas: "website design" 6,600/mo, "ai website builder" 3,600/mo, "ai automation" 2,900/mo.

4e. Backlinks and organic footprint

- **Backlinks:** 254 total, 93 referring domains, 0 broken.
- **Labs organic data** (domain overview, ranked keywords, competitors): empty in Saudi Arabia and Pakistan. The site has no measurable organic keyword footprint in these markets.

Phase 5. Findings and gaps

Strong for Local SEO. The GBP profile, reviews and Maps rank are populated and immediately useful: review gaps, owner replies and city-level rank gaps can be shown to clients per keyword.

Weak for this client. Labs organic data and LLM citations are empty or generic. The value case depends on the client's footprint, so the demo needs a site that ranks and is cited.

- **Fee floors:** LLM Mentions costs at least $0.10 per call even with 0 results. Plan the call count, not only the rows.
- **Live vs Standard:** nightly jobs must use Standard. Live Maps is $0.002 vs $0.0006 Standard.
- **Engineering gap:** ChatGPT-platform LLM search rejected the location field (error 40000). Not charged. Fix before the full test.
- **Plan document:** section 5.7 needs the corrections above. GBP reviews frequency (weekly vs monthly) and "manual refresh not charged" wording also need fixing.

Phase 6. Decision and next step

Approval requested: $50 top-up (DataForSEO minimum).

- Covers the full test: one cycle on a site with real footprint, a 2-night Standard run, and repeat calls for the LLM and local sets.
- Equivalent to **about 10 large-site projects for one month** at the high end ($5.07 each), or about 13 small-site projects at the high end, or about 48 full onboarding cycles.

- Before the top-up: rotate the DataForSEO password (exposed in chat on 4 Nov 2026).

Sources: live API responses, cost-test folder (raw JSON and costs.csv). Planning basis: product plan v2, section 5.7 (Crawllex project docs). Official DataForSEO pricing pages checked 4 Nov 2026 for Standard/Live SERP, On-Page, Labs, Keywords Data, minimum payment.
